

SOCIAL RESPONSIBILITY

At Jaeger Maritime Solutions GmbH, we are committed to operating as a socially responsible organization, dedicated to making a positive impact on society and the environment. As part of our mission, we actively support projects in the communities where we sell our products and services. By aligning our efforts with the regions we serve, we aim to create meaningful change and promote sustainable development.

Our support of local projects includes:

1 COMMUNITY DEVELOPMENT

We prioritize projects that contribute to the economic, social, and cultural development of the communities where our products are sold. This may include supporting initiatives such as infrastructure development, educational programs, healthcare facilities, and skills training.

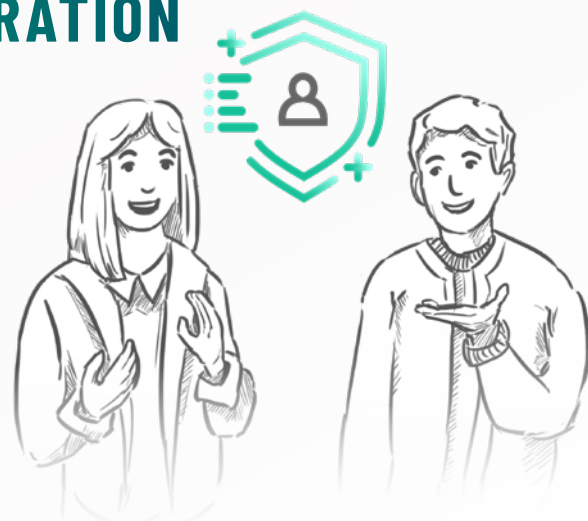

2 ENVIRONMENTAL STEWARDSHIP

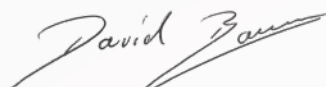

We recognize the importance of environmental stewardship and seek projects that address local environmental challenges. These initiatives may include reforestation efforts, waste management programs, renewable energy projects, or other sustainability-focused initiatives.

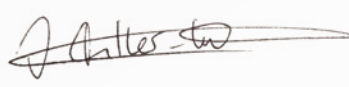

3 PARTNERSHIP AND COLLABORATION

We actively collaborate with local organizations, NGOs, and community groups to identify and support projects that align with our values and have a lasting impact. By leveraging their expertise and knowledge of the local context, we can maximize the effectiveness and reach of our efforts.

By supporting such projects, we aim to create a positive ripple effect that benefits both the communities and the environment. Our corporate social responsibility initiatives are continually reviewed and improved, to ensure that our actions have a meaningful and lasting impact.
